

Steel Ring Liquid Filter Bag（液体不锈钢环口过滤袋）

filter bag model	1#	2#	3#	4#	5#
size (mm)	180*430	180*810	108*230	108*380	150*510
filter area (m2)	0.25	0.5	0.056	0.115	0.3

The liquid non-magnetic steel ring monofilament filter bag is made of high-strength nylon plain woven filter mesh.

Absolute accuracy level, the surface of the material that is directly trapped by impurities larger than the mesh of the filter, and the particles whose diameter is smaller than the mesh number pass through the mesh to enter the

Other name:nylon filter bag,liquid filter bag,water filter bag,filter sock,polyester filter bag,nylon liquid filter bag,
bag filter for water treatment

Material:100% nylon

Mesh opening:1-600 micron

Size:1#,2#,3#,4#,5# liquid filter bag(see the technical indicator column for details of dimensions.),other siz

Mouth shape:steel ring

Advantages:

- 1.Corrosion resistance, long service life
- 2.Filter efficient

Application:

- 1.Food and beverages;
- 2.Bioengineering and pharmaceutical petrochemicals and chemicals;
- 3.Automobile manufacturing; oil and gas; electronics and electroplating;
- 4.Coatings, paints and inks; nuclear power and thermal power and waste liquid filtration;
- 5.Photographic film production process liquid filtration;
- 6.Daily chemical and liquid purification;
- 7.Various coolant filtration in the machining and refrigeration industries;
- 8.Various liquid purification in textile, printing and dyeing and papermaking industries.
